**“Sentry™ Visibility Sensor Selected for Mexico AWOS Systems”**

**Clarksville, Maryland, USA** – EnviroTech Sensors announces that the Sentry™ Visibility Sensor has been chosen by MTECH Systems Pty Ltd., Dingley, Australia for a project to upgrade several Mexican International airports with new AWOS systems. They have successfully integrated and installed several Sentry SVS1 Forward Scatter Visibility Sensors for the purpose of delivering CAT-II RVR capability to these airports. The sensors were fully tested by the customer and found to be accurate, calibrated and functioning correctly. The units worked flawlessly both in the factory during pre-delivery testing and also in the field during and after installation.

Since its formation in 1976, MTECH Systems has become a major supplier of solutions for the CNS, ATM & MET fields with equipment installed in 73 Domestic and 30 international Airports throughout the world. MTECH Systems' has developed a reputation for the ruggedness and reliability of its sensors and the quality and ease of use of its systems and software.

EnviroTech Sensors, Inc is a major supplier of fog and visibility sensors for maritime, road weather, and aviation applications. Founded in 2001, the company has sold more than 450 visibility sensors to 30 countries around the world.
